The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/679,919	Applicant(s) FERREE, BRET A.	
	Examiner Richard Shaffer	Art Unit 3733	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pisharodi (US Patent 6,610,093) in view of Gau (US Patent 7,037,340).

Pisharodi disclose (**Figure 5**) a device comprising: a first endplate (top **34**); a second end plate (bottom **34**); and a spacer component (**26F**) disposed between the two endplates; the endplate containing numerous roller bearings (**52**).

Pisharodi discloses all of the claimed limitations, except it is unclear whether the roller bearings are freely rolling balls (although such seems to be the case due to the ability of the embodiment of **Figure 5** to flex, extend, and move laterally with a slight twisting motion). Gau teaches (**Figures 12-17**) the use of free moving rolling balls to allow for an intervertebral spacer component to move in two planes. It would have been obvious to one having ordinary skill in the art to provide rolling balls as taught by Gau to the device of Pisharodi as a matter of substitution to provide for a means of movement of an intervertebral spacer with predictable results.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. However, it is noted that the ball

bearings of Gau are free to move in all directions and therefore are capable of swiveling in one axis and rotating about a horizontal axis.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard Shaffer whose telephone number is (571)272-8683. The examiner can normally be reached on Monday-Friday (7am-5pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
